Hi Rick (cc: Richard),

Here is a copy of the pre-draft NPDES permit for The Dalles dam and Fact Sheet for the Lower Columbia River dams. Please check out the language on BMPs for oil minimization, equipment maintenance, and other measures in the permit. These are best laid out in Appendix B in the permit. Part II.C requires the facility to use environmentally acceptable lubricants (EALs).

I'm very open to adding detail to the permit especially re: the oil accountability program or other minimization measures you think are important.

If you're able to send comments by mid-week, that would be very helpful. However, don't hesitate to let me know if you need more time, as this is a short turnaround.

Thanks!

Jenny Wu
